GreenToken Public Offering Closing - reimbursement of subscribers

Paris, November 14, 2020 - WPO announces the closing of the GreenToken Public Offering and the repayment of the subscribers.

The GreenToken Public Offering initiated by WPO, which was conducted from 8th September to 12th November, 2020, is now closed. At the end of the Public Offering, in conformity with the Information Document, the Auditor has certified the amount effectively raised in Euros and WPO announces that the soft cap has not been reached.

The GreenToken Public Offering has received subscriptions from nearly fifteen different countries. This interest, although insufficient, reinforces WPO's conviction that accelerating the Energy Transition will require the involvement of all. WPO remains convinced of the importance of digitalization in accelerating the Energy Transition and will continue to work towards this goal.

In compliance with the Information Document for the GreenToken Public Offering, the WPO Directorate and the GreenToken Investment Committee, in the person of its Chair, will proceed with the due diligence required for the repayment of the funds to subscribers of the Public Offering.

This repayment will be effective within a maximum of sixty (60) working days from the date of the Auditor's certificate on 13th November 2020.

Terms and conditions of repayment to subscribers

(From the Information Document Part 7 – section 2.6 page 94)

Throughout the subscription period, a subscribers' register has been kept by the manager of the EQUISAFE subscription platform. A register of payments in euros was kept by LEMON WAY and a register of digital assets (bitcoins and ethers) by COINHOUSE.

Subscribers will be fully reimbursed the amount of their subscription:

- For payments in euros, LEMON WAY will return the amount subscribed to each subscriber according to the means of payment used at the time of subscription (credit card used for payment or transfer to the account of origin of the transfer).
- For payments in digital assets (bitcoins, ethers), COINHOUSE will return the net digital assets received in its escrow accounts to the address where the transfer is sent.
- WPO bears the costs of escrow and transfer (money-out). However, the subscriber remains responsible for all applicable fees and commissions, if any, charged by its own custodian or brokerage providers, etc., as well as for the fees and commissions charged by the subscriber's bank.

Subscribers will receive in the next few days an e-mail informing them of the refund terms and conditions described above. Refunds will be implemented

About WPO

Established in 2008, WPO is a leader in independent asset management and associated specialized services for wind and solar power in Europe. The company oversees 600 production sites in 12 European countries with a capacity of more than 5 gigawatts, i.e. 2000 wind turbines and 12 million photovoltaic modules. Today, WPO contributes to the production of electricity from renewable sources for the equivalent of about two million people, almost the population of intramural Paris. It offers technical, commercial, and financial management solutions, and holds among its clients and stakeholders more than 360 companies, including investment funds, insurers, reinsurers, developers, banks, mixed economy companies and independent electricity producers. In a world where energy management is becoming increasingly decentralized and complex, WPO's main objective is to ensure energy sustainability and create the conditions for greater trust through issuing the first fully-traceable energy production certificates from reliable renewable sources on the world market. WPO is listed on the Financial Times FT-1000 2017 as one of Europe's 1000 Fastest Growing Companies
